

**Brand Name :** Tablet Cefpod-200

**Content:** Cefpodoxime proxetil 200mg

**Mechanism of use :**

Cefpodoxime proxetil is a semi-synthetic beta-lactam antibiotic belonging to the third generation oral cephalosporin group. Cefpodoxime proxetil is the prodrug of the bactericidal antibiotic cefpodoxime. The antibacterial action of cefpodoxime is through inhibition of bacterial cell wall synthesis .

Cephalosporins are bactericidal and have the same mode of action as other beta-lactam antibiotics (such as penicillins) but are less susceptible to penicillinases.

**How to use :**

Each tablet is taken as prescribed by physician.

Disperse the tablet in a tablespoonful(15ml) of boiled and cool water before administration.

Keep out of reach of children.

Store in a cool, dry place. Protect from direct light.
